Dr. Jing Zheng is an attorney in the Intellectual Property Practice Group in the firm's Silicon Valley office.

Areas of Practice

Dr. Zheng's practice areas include patent prosecution for semiconductor device and manufacturing process, computer software, digital/analog circuit design, and consumer electronics device. As an engineer-turned-attorney, Dr. Zheng's extensive technical background and industrial experience enable him to advise a client's IP issue from a tech insider's perspective.

Prior to entering law practice, Dr. Zheng worked as a software/algorithm engineer in Silicon Valley companies where he was responsible for the design and implementation of software algorithms for semiconductor inspection tools, such as reticle inspection and wafer inspection systems.
