About:

Leaders today don't just have to worry about nefarious cybercriminals getting "inside" their firewalls; there's an entire ecosystem of SAAS partners, third party vendors and suppliers, and all the hardware from switches to POS terminals that need to be monitored. How are you protecting your organization? What are you demanding from your partners and vendors in terms of protection? Reputational damage equals real-world dollars. Our session explores strategies and tools to help you fight the fight so your organization doesn't end up a "Target."
