

The Deal's Virtual Healthcare M&A Seminar

Healthcare Technology: How Disruptive Technologies are Changing the Market

Virtual Event

05.26.2021 | 11:30 a.m. - 12:30 p.m. ET

The digital health sector has experienced massive growth with the adoption of remote monitoring, telehealth and telemedicine services causing enormous disruptive changes in the market. Will the industry finally see advances in highly scalable machine learning and artificial intelligence solutions? Many experts feel that a shift to cloud-based EHR platforms that enable providers to access patient data anywhere, and communication and collaboration tools have strong potential for growth. What's next for the digital health sector, and how are disruptive technologies changing the landscape of deals?
