

Navigating NFTs: What Practitioners Need to Know

2022 World Technology Law Conference & 50th Anniversary Celebration

Fairmont, San Francisco

05.26.2022

Session 4: Navigating NFTs: What Practitioners Need to Know

16:45 to 17:30 PDT

NFTs are a unique emerging digital asset class that are bought, sold, and held using blockchain technology. In the US, NFTs have outpaced the regulatory framework. In the EU, the EU parliament's Economic and Monetary Affairs Committee voted in favor of a new draft of the Markets in Crypto Assets (MiCA) framework, an all-encompassing set of regulations covering the trading of digital assets across the 27-nation bloc. This session will explore key legal considerations associated with NFTs, including the complex issues of applicable law and regulation that may arise with cross-border sales.

Speakers:

- Jim Gatto, Sheppard Mullin, United States - Moderator
- Steve Krause, Dapper Labs, United States
- Katharina Lasota Heller, LEXcellence AG, Switzerland
