

Offshore Wind Supplier Day: California Edition

Doubletree by Hilton San Diego Mission Valley
12.14.2022

9AM - 5PM

The federal goal of 15 GW of floating offshore wind by 2035 and California's recently announced goal of deploying 25 GW of offshore wind energy by 2045 offer unprecedented growth opportunities for West Coast businesses throughout the supply chain. Hosted by the Business Network for Offshore Wind, Offshore Wind Supplier Day: California Edition offers your business the opportunity to learn about the latest offshore wind market updates. Learn about floating offshore wind, job opportunities, resources for your business, and connect with offshore wind developers, technology providers, and other suppliers.

Whether you are new to offshore wind or already participate in the industry, this unique event offers the latest insights into the West Coast offshore wind supply chain and gives your business direct access to industry leaders.

10AM: We Can't Wait: Current California Companies Working in Offshore Wind

Many California companies are already working in the offshore wind industry. Learn how they prepared themselves to enter the market, overcame challenges, and secured contracts.
