

SmallSat Symposium 2023 – Beyond Imagery: EO Sensors Enabling Radio Frequency Analysis, Methane Detection, Weather etc.

02.09.2023 | 11:30 AM - 12:15 PM

Why Attend?

Taking advantage of the boom in small satellite applications will require market players to arm themselves with the knowledge and insight needed to remain agile in a rapidly changing environment, marked by fast-paced technological growth, disruptive innovation and new market opportunities. The SmallSat Symposium provides exactly this opportunity: granting industry members unparalleled access to industry leaders, suppliers, partners and customers.

Agenda
