

## Global Warming: Are You Covered?

*California Lawyer*  
07.2008

Is it hot today? Maybe it's too hot. And maybe all that extra heat is causing other problems, like powerful hurricanes, melting ice caps, and rising tides, to name a few.

As the controversy rages over climate change and its consequences, state and federal authorities are responding to calls to regulate the greenhouse-gas emissions that contribute to global warming.
